 Portfolio

As a **recent graduate and aspiring software engineer**, I am eager to apply my academic knowledge and problem-solving skills in a professional setting. My studies have provided a strong foundation in key areas like data structures, algorithms, and full-stack development. I am highly motivated to contribute to innovative projects and continuously grow my technical expertise as a dedicated **fresher** in the industry.

PROJECTS

Quick Stay

A WebApp for hotel booking

Our platform is a premier hotel booking app dedicated to providing a seamless and reliable experience for booking **full-night accommodations**. We cater to travelers seeking quality, comfort, and peace of mind during their stays, whether for business trips, family vacations, or leisurely getaways.

Quick Chat

A WebApp for online chatting

Welcome to **QuickChat**, a streamlined and secure platform designed for instant, real-time online communication. Our web app provides a frictionless way to connect with friends, family, colleagues, or communities, focusing purely on efficient and direct messaging.

Mp42WebP

Free Online converter

A client-side web application for converting MP4 videos to optimized animated WebP images.

TS2MP4

Free Online Converter

A client-side web application for converting TS videos to MP4 Videos.

WebM2WebP

Free Online converter

A client-side web application for converting WebM videos to optimized animated WebP images.

GIF2WebP

Free Online converter

A client-side web application for converting GIF to WebP images.

SwiftView

Prview files without opening it

SwiftView is a revolutionary web application designed to save you time and streamline your workflow. We eliminate the need to download or launch heavy applications just to glance at a file. Our platform allows you to **instantly preview documents, images, and various media types directly in your browser without ever fully opening the native file.**

Lucide Icons

Beautiful & consistent icons

Open Source Contributor, Lucide Icons Contributing to a world-class icon library by designing and optimizing high-performance SVG assets. I focus on technical precision and minimal file sizes to ensure icons render instantly and scale seamlessly, supporting streamlined, "at-a-glance" user interfaces for millions of developers and end-users worldwide.

LinksHub

Library of links

LinksHub aims to provide developers with access to a wide range of free resources and tools that they can use in their work. These resources include links to free **software, libraries, frameworks, and other tools** that can be used to build and deploy applications and websites.
